About Orissa Chemical Society

The Orissa Chemical Society(OCS) is the apex society of the chemists of the state. Conceptualized in the School of Chemistry, Sambalpur University in 1985, the society was formed with late Prof Mahendra Kumar Rout as the Founder President. Since then, the OCS has consistently grown in strength with a respectable member base. Founded on the principle of equal emphasis on quality teaching and research in frontline areas of chemical science, the OCS has attracted many members from inside and outside the state, with some members from overseas. The Society organizes regional and Annual conferences at regular intervals each year in Institute of Higher education and research, spread all over the state. In keeping with this norm, the Department of Chemistry, Dhenkanal Autonomous College, Dhenkanal, Odisha is organizing an International Conference on 'Recent Advances in Chemical Science', which is the first OCS extended lecture series.

About Dhenkanal Autonomous College

Situated in the sylvan setting of forest, hill and mango groves Dhenkanal Autonomous College is the premier college of Odisha. Established in the year of 1959 at the backdrop of picturesque landscape, the college has carved a niche for itself in the academic excellence in the state and the country. The results of students testify to this honour. However an endless pursuit of excellence being the motto, the college is forever endeavoring to excel itself. The department of Chemistry is one of the oldest and glorious department in the history of Dhenkanal Autonomous College. The dept has made a hallmark in chemistry teaching since its inception. The department's vision is not only to impart knowledge to the students through effective teaching but also to inspire them to take Chemistry as career. The department offers 3 year degree courses in Bachelor of Science. The courses have been designed as per Choice Based Credit System (CBCS) prescribed by the Utkal University. The institution is the feeder college for all the reputed Universities of the state and all leading National Institutes like Central Universities, NITs and IITs.

About the International Conference

The human being is now facing many challenges for its existence. Sustainable developments coupled with equitable environmental management and the current COVID pandemic, impose enormous challenges on human civilization. New methods and strategies are required to address and overcome these issues. The discipline of Chemical Science are known to provide solutions to various such challenges consistently. Many breakthrough discoveries made by chemical scientists across the Globe have revolutionized the quality of life and living. The International Conference aims to create awareness among the young students and researchers about the recent developments of chemical sciences at the National & International level. In this lecture series many scientists of international repute from various parts of the world will deliver a talk on recent developments in Chemistry. It is hoped that the academic transactions in the conference will be beneficial to all the chemical scientists.
